## Before & After School Enrichment Activities for Our EMS Students

The Eudora Schools Foundation and the Eudora School District is pleased to team up with our middle school teachers and administrators to create engaging before and after-school enrichment program for our EMS students. We recognizes the need and importance of additional hands-on learning opportunities particularly at this pivotal time in a middle school student's life.

We are thrilled to support these programs that help EMS students 1) build new skills and interest 2) develop self-confidence 3) gain knowledge from a cross-disciplinary, real-world learning opportunities that support core subjects in their classroom curriculum.

EMS students can sign-up with individual teachers or in the front office.

# ENRICHMENT

## EUDORA MIDDLE SCHOOL

### Book Club 6th Grade

--Sarah Weirick

The goal of 6th Grade Book Club is to provide students with the opportunity to read books that are relevant to their lives, engaging, and create academic discussion on theme. This book club allows students to read books that encourage the positive aspects of middle school and growing up.

### Chess!

--Paul Kaldahl

We play chess before school. The game is beautiful, challenging, and exhilarating. Being caught up in a close game fires up the brain in ways that few other things can.

### EMS FBLA - 8th Grade

--Heather Adams & Beth Zimmerman

Future Business Leaders of America is an engaging program that develops a student's leadership and workplace skills. It helps students to see the importance of volunteering and encourages them to find new ways to assist in the community. This club would focus on community service along with learning leadership skills, and basic job skills

### First Aid

--Sondra Garner & Danielle Young

This program would teach students basic universal skills on how to save a life. This program might inspire them to work in the medical field or it could help in a babysitting incident. This program would be an extension of health class.

### Hand-lettering

--Haley Archer

Students will develop techniques and strategies to communicate through a variety of hand-lettering styles. Students will study and practice the techniques of current artists and will later create their own hand-lettering style/font. This program will change the way students view visual communication.

### Hunger Games: Eliminate Hunger

--Shanda Hurla & Lindsey Hoover

Our goal is to give students the opportunity to understand and investigate domestic hunger in the U.S. and our own community. We will look at the causes, effects, and interventions of food insecurity and also participate in a community food mapping project. Our capstone project students will pack hundreds of delicious, healthy meals that are given to Eudora Food Pantry.

### KnitWits

--Angie Kennedy

Knitting is a wonderful skill, as it teaches patience and creativity. Once students learn the basic knitting skills, they can then progress to more difficult pieces such as hats and scarves that we are hoping to donate to individuals in need.

### LinkUP Mentoring

--Shanda Hurla

LinkUP is a fantastic way for students to interact with engaged community members as they work to design an individual project where student achieve goals and learn skills from their mentor.

### Problem Solving

--Mitchell Tegtmeier

Problem solving is a critical 21st century employee skill. Students will learn these skills by utilizing breakout boxes, technical competitions, and STEM experiments. Students will be in challenging and difficult situations, yet have fun finding solutions to problems.

### Project Runway

--Sarah Weirick

Project Runway is an opportunity for students to create their own garments in a collaborative environment. Students will create various outfits and compete against other groups to see who are the "star designers" A great opportunity for students to work in a collaborative environment learning new skills.
